¹ Includes soybeans, soybean meal, and vegetable oils.

² Includes processed feeds, fodder, barley, oats, rye, and sorghum.

2022 Success Stories

Panama Rescinds Biotech Regulation: FAS’s quick action ensured that Panama rescinded a poorly conceived biotech regulation that would have established requirements for “GMOs”, preserving access for exports of genetically engineered U.S. corn, cotton, and soybeans (including soybean meal and soybean oil) valued at \$250 million in 2021.

Beefing up U.S. Beef Exports to Japan - USDA and USTR Work Together: In 2022, USDA successfully worked with Japan to negotiate a beef trade safeguard as part of the U.S.-Japan Free Trade Agreement. The safeguard allows for increased U.S. beef exports to Japan, reduces the chance of higher tariffs being imposed on U.S. beef, and generates growth opportunities for \$150 million more in U.S. beef exports to Japan.
